Subject: marked security vehicles

Good day Ms.Crawford, I am a security officer(command staff) ,and I on emergency I have to respond to an officer safety ,and use my P.O.V. (which have green and amber lights)with no security marking, due to the safety of my family when going home. Our company vehicles have markings and light bars, Our Command staff are on call 24/7 and have unmarked units for safety due to the areas we must respond in ,and need not be seen when arriving and leaving our property and heading home to our family. The ruling to have all security vehicles marked will bring a safety issues for command staff who are on call 24/7 and have there vehicle in front of there homes. I would like you reconsider the rulling due to the safety of our family and our Command staff. Thank you
